2019-2020

Acknowledgement

It is my great pleasure to present the report on the Swachha Bharat Summer Internship Program 2019. There are lots of new things I have learnt in this journey of *Swachhata Abhiyan*. There are lots of eminent personalities who give their helping hand to make successful my summer internship.

Initially, I am giving my heartfelt thanks to my Principal Sir, **Prof. Pawar Alok Arjun Alka**, who have not only encourage me to do this program but also they have supported me in each and every right direction towards the success of path. He has guided me to choose the village for the Swachhata Abhiyan. He also joined me at every village to work out my Abhiyan in smoothen direction. He helped me to settle the drama which we played in front of the audience as well as he also directed me how the participation of the people should be involved in this Abhiyan. Initially, I was worried about how alone I do this program but due to his continuous guidance, motivation this is successful.

I am also thankful to, **Prof. Atul Mitkari**, Program officer - NSS, Swaraj College of Commerce and Computer Studies. He always encouraged me to perform various things in a different direction. He mainly supported me in financial things from the college. Without his continuous support, it is unable to me perform the various task to in easier way.

Finally, I am thankful to **Prof. Swapnali Korhale - Pawar**, Asst. Prof. English Dept. Swaraj College of CCS, Pune help me for the availability of her vehicle to journey where I perform my Abhiyan. I thank madam that giving me this convenience. She also helps me with report writing.

I also thank my family members and friends to provide me continued to support where ever required.

♣ Forwarding ♣

Here I am happy to write the forwarding message on the report of the Swachha Bharat Abhiyan 2019 which is made by one of the favourite student **Kolhe Akash Kundalik**. Here I am especially call him one of the favourite student since his work towards society is really motivated; not only among other students but also to all the society. He had covered all possible area wherever he would possible. I am impressed about his dedication since in the heavy rainy seasons he did not stop his work since he had the time limit for this Abhiyan. Ultimately I couldn't stop myself to join him in this work.

I am glad since he wants to deliver his message about Swachha Bharat Abhiyan towards the students of all ages; right from Anganwadi students to college going students. Since he said that students are the only generation which having the spark who can change the society.

Akash has covered total 22 schools/college/Anganwadis where he has done counselling on the more than two thousand students. Even he visited lots of houses, shops, organisations where he met more than two thousand five hundred people and talked his idea about the garbage management. This digit two thousand five hundred is so BIG which impressive to see his dedication since a single student can do a lot of achievement. Initially he has worried about is this possible to make alone this kind of Abhiyan successfully but finally he show how one person can do much better.

All The Best my Dear Akash!

Day 1:

11th July 2019

Village : Usarewadi, Bhadgoan and Khonde, Bhadgoan, Tal. Khed, District Ratnagiri

We take great opportunity to work with Swachha Bharat Abhiyan in the area which is famous for mangoes that is Ratnagiri. We take Khed Taluka for the Abhiyan. Here we have delivered the Swachhata lecture in two Zilha Parishad Schools which are in Bhadgoan. These both schools are placed in the remote area; there are students who are from the first standard to the fifth standard. These students were happy to answer us about the questions of Swachhata. We delivered a valuable lecture which is related to the Swachhata. We also showed one movie which is based on what kind of garbage available on the roadside. We also define the types of garbage i.e. wet garbage and dry garbage with various examples. Students are happy in answering of classifying the wet and dry garbage. We instantly created a drama in the school with the help of school students. Students also took the opportunity to participate in drama to show their skills. This drama is based on the open toilet which further problematic. Z. P. Adarsh School, Khonde, Tal. Khed, Dist. Ratnagiri were having a total of 27 students along with 5 teaching staff in our Swachhata session. Head Mistress **Smt. Pratibha Chinchole**, was finally happy with our track of Swachhata since according to her we are conducting very smooth lecture on the student to whom she belongs. Z.P. School Bhadgoan, Tal. Khed Dist. Ratnagiri has total 75 students along with 2 teaching staff. Finally, we took the pledge which is based on the Swachhata in both the schools. Teachers *Mr. Deepak Namdev Kamble, Mrs. Mayuri Manoj Shirgoankar, Smt. Pratibha Anil Chingale, Mr. Anant Sitaram Pawar, Mrs. Anjali Anant Ghadshi* from the first school and *Mr. Ganesh Bhagwan Veerkar, and Mrs. Trupti Tukaram Katale* from the second school have given the thanking session for us. Even postman of the village *Mr. Anil Dhumak* also joined our Swachhata pledge.

We were also talking with people who are residents of the Urasewadi and Khonde village to know how they can manage their household garbage. We share our idea about the classification of household garbage in a different manner. People were happy to listen our idea about the classification of garbage.

Gram Sevak of the Bhadgoan, Khed **Mr. Bhaskar Ganpat Devkhate** appreciate our Swachhata work which we done in their village within the rainy seasons.

Day 2

14th July 2019

Village : Gorhe Bk. Village, Tal. Haveli, Dist. Pune.

Swachha Bharat Internship program 2019 day 2 was started by us on Sunday, 14th July 2019. Initially, in the morning 7.30, we began with cleaning the tracks in Gorhe Bk. village, Dist. Pune. People are using the Ghanta Gadi to drop their household garbage which includes the papers, plastic and it mixed up with household waste such as left foot etc. Some people also throw the garbage on the road, which further creates problems to the same village people regarding their health. We were counselling these people on the Arogya Karyshala taken by the *Sarpanch Shri. Lahu Khirid*. We have taken the session in which we covered the points e.g. how unclean area further becomes problematic on the health of the peoples. Mosquitoes and housefly can further be dangerous for circulating the disease. On this occasion *Mr. Sachin Pasalkar* (Yuvasena, District Head), *Mr. Pritam Uplab* (Contact Head, Khadakwasala Constituency), *Mr. Nitin Wagh* (President Shivsena, Khadakwasala Constituency), *Mr. Sushant Khirid* (Ex - Sarpanch), *Mr. Sandeep Khirid* (Shivsena Branch Head) were present.

So many people were happy to answer this kind of discussion on garbage management. Here many people do have their own land for agriculture who borrows the fertilizer to grow their crops. But they didn't have the idea that they can produce their own homemade fertilizer by putting their everyday waste such as wet garbage into a dunghill. Here we have counselled to many people how they classify wet and dry garbage and just only put the wet garbage into a dunghill. Here we explain to the people, how to make 'Earthworm fertilizer' by discussing about adding the wet garbage into dunghill by adding just small amount of earthworms and dung.

Their after we also clean some parts of the roadside area of Khadakwadala dam where more number of people visit every day. Through Khadakwasala dam all people of Pune get their drinking water. So the source should be clear. Since further filtering process is timely and costly too. So this area should always maintain clean. We found that many people throw their used paper and plastic bottles waste on the side of the Khadakwasala. We talked with the shopkeepers who run their food - corners which are edge-side of Khadakwasala dam. We advice them to place the dustbin near to their shop, especially corn seller and other who sale

the Bisleri water bottles and even they have to talk to their customer to put their wastage in the dustbin only. We were cleaning the area by total of 2 hours.

Summary of Day 2

Sr. No.	Location	People Acknowledges	Conducted Track as (in Short)	Total Time
1	Front Side of Grampanchayat, Gorhe (Bk) and Roadside of Agriculture Land	Total Peoples Contributed with us: 08	Cleaning Roadside	3 Hours
2.	Grampanchayat, Gorhe (Bk)	Total Peoples: 70	Counselling in Arogya Karyshala	2 Hours
3.	Roadside /Edgeside of Khadakwasala Dam	Total Peoples: 12	Cleaning Roadside of Khadakwasala	2 Hours

Day 3

16th July 2019

Village : Nimgoan-wadi and Nimgoan - Korhale, Tal. Rahata, District Ahemadnagar

This was the Spiritual day while we took the blessing from *Shri Saibaba (Shirdi Mandir)* and choose the nearer village as Nimgoan. Initially we visit the Saibaba Temple with the curiosity of the management of rose flowers which are collected by the many devotees'. These rose flowers are converted by scented *Agarbatties* (Behal, 2017). This is the better management of waste flowers.

We started our day 3 of working with First time the college going boys. This is the most challenging task for us since we have to talk the higher level students. We have visited the students of Shri Saibaba Sansthan Trust Shirdi Shri Saibaba College. *Prof. Shelke Kishor R.* NSS officer has introduced our layout of the program. While talking with these students we summarised the points about how many devotees minimum daily visit to the Saibaba Temple. Is the garbage increasing within the Shirdi itself like plastic bottles, plastic bags or other garbage? Do you know how the plastic management is been done? Here we have explained the classification of the garbage (wet and dry garbage). Further we discussed our ideas with the student e.g. vermi-compost is traditional method which is basic science students know, but what about the dry garbage management especially plastic bottles and bags.

We know high calorie plastic waste takes long time to disposal approximately 300 years however still plastic manufacturing is going on. Now the question is what to do for this large number of high calorie plastic? Which method would be appropriate? At the discussing, we have explained the students about 'plasma pyrolysis technique' which is technique high calorie plastic-waste converted into synthetic gas. By using this gas can start gas turbine, from which we can generate energy. We can use this energy in many ways. Through a video demonstration we explained to students what is the process? How this plasma pyrolysis technique works? Now the next question is what our responsibility is now. We used lot of types of plastic from which we classify the hard level of plastic and submit it towards junk dealer who further submit this kind of plastic to this plasma pyrolysis technique and even he gives us money according to its weight.

We have also explained the 3R's (Reduce, Recycle and Reuse) with lot of examples about various things which we want to put in the garbage. College going students are actively participate in our lecture.

Further we visited the Z. P. School, Nimgoanwadi, Shirdi, Tal. Rahata, Dist, Ahemadnagar. This school is of standard first to standard fourth of total students 132. In this school we started our session about classification of garbage that is dry and wet garbage. Students were little bit confused about the proper example session of this classification. For example, wet papers come under which category of garbage. But by defining we properly classify the types of garbage. Students were also participating in our drama session. Students liked and acknowledged us about the drama and its contents in the word what they come to know. We also discussed with students how the open toilets and open pissing is further affects our health. We also took the drawing session in which we give them some topic on Swachhata. Students were happy in the drawing session in which we drew some pictures related to Swachhata Abhiyan on the board and tell students to draw this in your books. Some of students were making their own ideas and draw their picture best. Finally we took Swachhata Pladge. *Head Mistress Mrs. Gaikwad P. N.* and teachers *Mrs. Hajare M.K., Mrs. Jogdand S.D., Mr. Bhangare S. V.* and *Mr. Jagtap A.M.* appreciate our work on swachhata Abhiyan.

End of the day we visited ISO certified Z. P. Semi English School, Nimgoan- Korhale, Shirdi, Tal. Rahata, Dist, Ahemadnagar. We started with regular delivery of session including the classification of garbage. School students actively participated in the drama session. These school students were answering with various questions on the garbage management, open toilets and pissing and their issues on that we gave some solutions them. We finish our day work by taking pledge in the school.

Summary of Day 3

Day 4

17th July 2019

Village : Nimgoanwadi and Nimgoan - Korhale, Tal. Rahata, District Ahemadnagar

Nimgaon (Korhale) is a village located near to the famous shrine - Shirdi (Saibaba) of Ahmednagar district. We had started our day of Swachhata Abhiyan with Nimgaon (Korhale) on Wednesday, 17th July 2019. We visited Pravara Gramin Shikshan Sanstha's, Pravara Madhyamik Vidyalaya, Nimgaon (Korhale) having students of standard five to standard ten. In 'Swachh Bharat Summer Internship' (SBSI) we had taken a session on "Garbage to Gold". In this session, we explained the students from waste classification to waste management. We explained the five types of waste which are commonly found around the house. We guided students for zero waste management. Through the films and drama, we shared information on solid waste in the school. We explained the students important and advantages of 3R and the process of processing household waste.

Now recently GOI (government of India) launched the Digital India campaign. Due to the use of different technology E-waste is rapidly produced.

In that session, we focused on E-waste. For students' better understanding we gave some common examples of E-waste like Computer, monitor, CPU, keyboard, laptop Mobile and charger. We explained the students by video what's E-waste? Where it produced? What poisonous substances are derived from this? While talking about toxic pollutants, we also told them that the illness was from Mercury, cadmium, chromium, plastics. Also, E-waste contains some Valuable elements like gold, silver, copper. We told them to give participants an awareness campus to enlighten how problematic this can be? We told them the scientific disposal method for E-waste by using 3R (reduce, reuse, recycle). We also explained them how to manage E-waste? In India, there are 150 E-waste Authorized recycler works. E-waste collector collects E-waste from your home and gives money based on their weight. By Business view, there are more opportunities in E-waste and Benefits of E-waste? In the last session, we both presented a short drama on the open toilet in front of students. We explained to them how problematic this can be and get the pledge of the swatch.

There are seven teachers are present for this session in that Headmaster of the Pravara Madhyamik Vidyalaya, Nimgaon (Korhale) Mr. Joshi S. K. and Sub-teacher Mr. Godage

Bandopant Shreekant, Mr. Duke Kishor Shamrao, Mr. Sonavane A. B. Mr. Shinde Bhanudas Dhondiram, Mr. Kakad Machindra Maruti and Mr. Dange Y. U. They validated us for the work what we do and gave best wishes for next.

After that we meet the Anganwadi Students. There are 50 students in the Anganwadi. We started our session with the dancing session. Students were happy to dance with us. We all were dancing on the Swachata Song. Further we checked the nails of all children and made star that cut their nails properly. Student show their star to their madam happily. They acknowledges how nail cutting importance by this session.

Further we gave chocolates to all students and told them keep your rapper with you. Further we started their interesting practical session. We took two dustbins and told students that please put the rapper side of the dustbins. We added some more garbage like paper cutting, thermacol, leafs, chocked pencil, leafs, plastic bags etc. Further we told to students that both the dustbins for dry garbage and wet garbage. Please put the garbage into its proper dustbins. We make big round and pick randomly one student and move around the garbage. We can sing song too

Kachara Koni takla, Mi nahi takla

Omkar ne Ghetale paan,

Paan Kuthe takayache

Paan Takayache Olya kacharyachya Dabbayat

Kachara Koni takla, Mi nahi takla

Shruti ne Ghetale kagat,

Kagat Kuthe takayache

Paan Takayache Sukya kacharyachya Dabbayat

Likewise all the students are happy with this kind of playing. After that we started with folk song session with them. Students were happy to dance again on Koli song. This song somewhat we change.

Finally we have taken the pledge with the students including their parents. Parents were happy while in their anganwadi today their children have learnt something new. We were also counselling to their parent how this swachhata training they can continue at their home.

Further we visit the junk dealer shop.

Case Study: THE BUSINESS OF SCRAP

We sell the Equivalent to waste from home to the scrap. Then junk dealers try to sell the waste to the market again. But often the waste doesn't get the price, so he throws the wreckage into the open space. As a result, the surrounding area is covered by uncleanness. So we visited a junk dealer to find out the role of junk warehouses, how they dispose of the litter, how they manage the waste? And where the warehouses were being stored, for this waste collection they were paid for their work.

We visited the "Khwaja Garib Nawaz" junk dealer which is situated roadside of Nimgaon (Korhale), from District Ahmednagar.

There we meet Mr. Altaf Budhan Shaha who was the owner of that junk shop. Mr. Altaf is not much educated. He finished their Elementary education here. The situation in the house was immense. So he started a wreck business for a living. They found this business to be very profitable. Then he increases their business.

We told them what was working. We also explained to them what campaign we are running. They knew the importance and need of this work and awareness, they greeted our work.

Then we started asking them questions about their work process, like how do you manage this waste, what do you do next, what kind of waste do you take etc. On these questions he explained us one by one that; in depot different type of approximately 400kg to 500kg of waste comes in a day. In that mostly plastics, colour plastics, plastic bottles, glass bottles, parts of Iron, Cooper, Brass, German, newspaper's, plastic-bags, plastic-paper, pipes, Cardboards, different type of wires, glasses and electronics waste etc. are seen. They told us how they separate the plastic and sent it to Rocken company, Sinnar for the process of recycling. There, new products are created using these processes. Then how they separate the parts of Iron and send it to Kalika company, Jalana for the process of recycling. There still, nut-bold likewise many mores products are created by using recycling process. Separated cardboards and newspapers are sent to Nashik for their recycling. By the process of recycling we can use them into new created newspaper and cardboard. By using recycling process pipe is created from all plastic bags; however glass is converted into new glass.

Some amount of plastic is used in our clothes too. They also talked about how they get money from it. Also explained how this business is good. In last they told how to pay their workers.

They told us about the secret behind the city's waste reduction. We asked them can we take some measures. On that he told us if everyone keeps garbage stored in the house, it will certainly save money and time. This money will be used for a different purpose. They showed us all the depots around, all the garbage demonstrations.

We meet the villagers of Nimgaon (Korhale), Nimgaonwadi and Shirdi. We explained them that how in our home, our farm and our surrounding which waste is produced. An important part of solid waste management is the classification of solid waste. We explained them how classified solids waste. We told them Solids waste generally classified as follows

1. Wet waste / decomposable waste.
2. Dry waste / non-decomposable waste.
3. Reusable waste

On that we told them different methods of compost. In that we mainly focused on Biogas, soak-pit, pit, collected garbage and Vermicomposting method. We explained them so many benefits of these methods. While explaining we told them general benefits which are follows

- 1)Fertilizer is produced. So the texture of the soil remains.
- 2)The ventilation causes heat and causes germs to die.
- 3)Pesticides are not produced.

Outside the village or in the village, there are Garbage pits or *Ukirda*. For household composting this is better method but some people add plastic in that, we told them how this can be problematic. We gave the advice to villagers to made soak pit for their kitchen-water, washroom-water, and bathroom-water and leave it all in that. We also told them it's advantages and importance.

In village we visited some Grocery store, hotels, haircutting shops, hospitals, grampanchayat, chicken shops, clothes shop, some electronic repairing shops and also different type of many small shops in Shirdi and asked them how they manage their waste. We communicated with them on management, solution and trying to understand what difficulty face they on waste. Then we met Mrs. Shilpa Kailas Katore Sarpancha and Upsarpanch of Ajay Sopan Jagatap. Sarpancha madam validated us for our work. We discussed on solid waste and their solution. We also discussed how to do awareness on cleanness in our village.

Summary of Day 4

Day 5:

21st July 2019

Village : Alandewadi Tal. Bhor Dist. Pune

We have started our day 5 of Swachha Bharat Abhiyan with the counselling about segregation of garbage into two parts i.e. wet and dry garbage on 21st July 2019. Most of the people use their own pit known as Ukirda to put their routine wet garbage. Dry garbage they use in their water heating process. Almost all village people use the dry garbage i.e. plastic and paper into Chula. We were counselling them how this kind of burning paper and plastic is not safe in usage which is making pollution but also it further affects the health who continue seats in front of Chula. People having the provision of gas and cylinder but then also they more prefer to the Chula especially for making Bhakari and hot water. The people do not having their own pit use the common pit to put their daily garbage. This garbage we found in the mixed kind of garbage which further makes soil erosion. We have talked more than 100 people along with their family about how the classification of wet and dry garbage is essential further.

On the basic of 3R's (Reduce, Reuse and Recycle) we covered specially one 'R'. We do a workshop on the women, in which we demonstrate the '**Reuse**' from waste cloths especially sari and milk plastic bags. In the workshop, we teach how to make doormat from old sari. We also teach how to make *Gajara* from milk plastic bags. Total of 15 women's participates in this workshop. Even the **Sarpanch Mrs. Pratibha Madhukar Pawar**, also actively participate in this workshop. This workshop terminated by certificate distribution. From the Swaraj College of Commerce and Computer Studies we distribute the certificates. As these ladies are engaged in an entire day in *Bhat Lawani* (Rice planting) this workshop was started at 7 o'clock evening and ended with 12 o'clock night. **Sarpanch Mrs. Pratibha Pawar** had appreciated us that we have taken this kind of adjustment as for the time management by the women's in their village.

We gave advice to Alandewadi people;

- (1) Classify the dry and wet garbage separately while wet garbage is used to make fertilizer and dry garbage is also further classifying in such way that we can sale papers, bottles, plastic bags to wrecked. Likewise they earn small amount of money.

- (2) Always think of Reuse property, like as we convert old sari into doormat and milk plastic bags into *gajara*.
- (3) Use toilets and bathroom rather than open latrine.
- (4) Do not use paper and plastic for Chula which is further affects on the health issues.

Summary of Day 5

Sr. No.	Location	People Acknowledges and Track	Conducted Track as (in Short)	Total Time
1	Alandewadi Village, Tal. Bhor, Dist. Pune	Total Peoples: 108	Discussion about garbage management and our idea about garbage management, Counselling them for soak pit, Biogas, vermicompost etc.	5 Hours
2.	Hanuman Temple, Alandewadi, Tal. Bhor, Dist. Pune	Total women Participants : 15	Workshop of making doormat from the old sari and Gajara from the milk plastic bags (<i>Reuse</i>)	5 Hours

Day 6:

22nd July 2019

Village : Alande, Tal. Bhor, Dist. Pune

On the 22nd July we started our 5th Day where we covered area of village Alande which is in Tal. Bhor, Dist. Pune. In this village primarily at early morning we can take cleaning track of the road. We found that on the road itself people throw their household garbage without any classification. Overall garbage contains the milk bags, other kinds of plastic bottles, waste cloths, waste food, vegetables remaining, alcohol bottles, box, aluminium tins, and many more. We were advising people that do not throw here at least the alcohol bottles which are generally made up of glass and aluminium tins. This kind of garbage is dangerous since glass can injure the foot, or it may cause the vehicle i.e. puncture. Resident people should watch who should be thrown this type of garbage and it is their responsibility to advice such people who maintain their village unclean.

We also visited one saloon shop and the barber who used to throw their daily cut hairs, blade, and waste into plastic bags on rode-side. We advice the saloon owner that if he takes pit near to the one of the large plant then the waste hairs will provide the nitrogen to the tree which further useful for the growth of the tree. Even these cut hairs maintain the water level for the plants.

Further we visit one of the largest poultry in Alande. The owner of the poultry can show us how his poultry clean and maintain. This poultry produce the two kinds of waste one that is dirt of hens and other is gas. Owner having the AC system in his overall poultry since it is one of the automated system poultry by which gas can come out from the poultry. The dirt of the hens, he gives to farmers which further used as fertilizers. This poultry is one of the samples for us to maintain the garbage management.

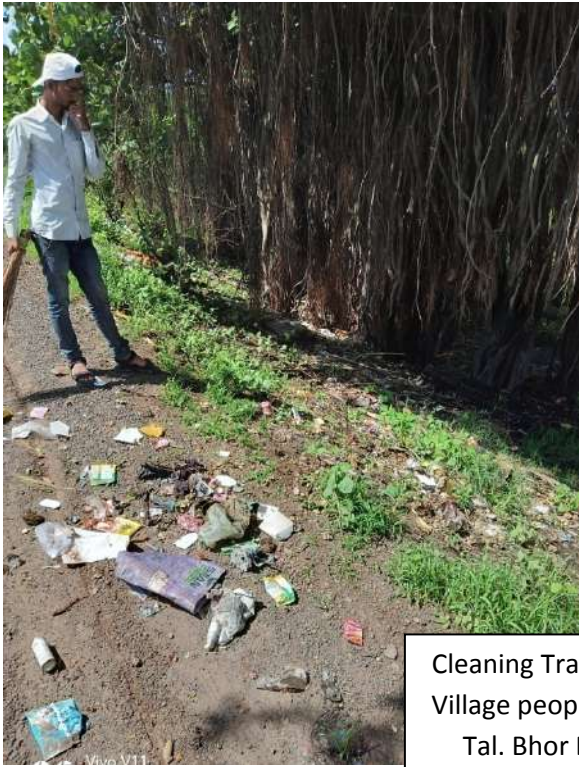

After that we visit the Z. P. School Alande where we took our two sessions for the students of standard first to fourth and fifth to seventh respectively. We showed the film based on the garbage and its effects. We also performed a short drama with the help of the students. In our session we also gave the focus on classification of the garbage, problems due to open toilet. Finally we took pledge of Swachhata on the school ground where all students and teachers collect. Teachers of the school all can assure us that they can work out with our ideas which we share among the students.

We also visited one more school Appasaheb Bandal Highschool, Alande, Bhor where we took session on the students of standard eight to standard tenth. Students were answering us as they have bio- degradable and non - degradable in their syllabus itself. But they cannot view towards the benefit of garbage as one of the fertiliser which is further used for their farm. We performed a small drama in front of students through which they got to know how the open toilets are not only the problem of one man but also it is problematic towards residents near to dirty area. We also gave demonstration about the classification of the dry and wet garbage and information about the three R's i.e. Reduce, Reuse and Recycle. There are total 118 students are there in the session as we divide the session into two parts. The session ends up with taking pledge by students. Finally we did plantation in the school premises along with the head mistress of the school ***Mrs. Madhuri Sonawane***.

Further we met the *Sarpanch Mrs. Vaneeta Nande* and talk regarding the garbage issue occurs in their village. We have shared our idea about the making of fertiliser by using wet garbage and one unit to be there in village which is look out the dry garbage. She is happy with communicate with us. ***Gramsevika Mrs. Deepali Bhor*** joined with us. We together make plantation in the village of at least 20 different fruit plants.

Day 7:

23rd July 2019

Village : Alandewadi, Tal. Bhor, Dist. Pune

We started day 7 with again continuing with taking and acknowledges the people of Alandewadi village on the 23rd July 2019. People were nicely communicated with us on the garbage issue. Village people required the clean and neat village but they have no such provisions which city people get like *Ghanta Gadi* etc. Here with we have talked with them regarding the classification of the wet and dry garbage from the household garbage. Day 2 of Alandewadi we again talk with more than 125 people. We planted the Cuddle and Mango plant with near about 15 houses.

Alandewadi get bore-water (Hand pump) and well-water for drinking and regular usage. Some of people can stored the water as water come on alternative days. One house we found that the water tank with huge moss with it. There are only two women are residing from one is lame and second her mother is of old in age. Outside to their house, there is unused water tank in which that lady store water for cattle's. The tank is as open and occupy by huge moss, it also having mosquito's larvae. We have cleaned that water tank and close the top part since it cannot further affect by mosquitoes. We advised to the lady to clean the tank at least after every 3 weeks. Otherwise the people near resident may be suffering by illness like dengue etc.

We also visited one hotel which is on highway and asked them how they manage their daily waste of hotel. Answer was that they collectively throw it through bags in the pit called as *Ukirda*. But this *Ukirda* is not further provisional usage since it is collection of hotel waste such as Vegetable residue, left food, tissue papers, plastic, water bottles, and plastic bags etc. We have advised the hotel owner to use the pit only for the wet garbage such as left food and not for the plastics, tissue papers, plastic bags and plastic bottles. This kind of garbage they can sell collectively once in the week or once in the month according to their storage capacity to the proper people who do process further on this kind of waste. We also share them the Bisleri used bottle waste management. From the website or app of Bisleri we have to contact them, in the next 48 hours they can contact us or even they should take the workshop for us that how to we manage the Bisleri bottles.

Finally we take session on the Z. P. Primary School, Alandewadi, Bhairavnathnagar on the students who studying in first to fourth standard. There are total of 22 students with two teachers. Students were happy to see the movie which we show them. They are also participating in the drama which is based on the garbage collection, open latrine, open toilet problems. We also present one session on them which is based on the classification of garbage. All Students easily classify dry and wet garbage. To these small children we have demonstrated how to wash our hands before eat anything. We also explained why hand wash is essential as we playing in grounds, we might touch to animals or there are lots of microorganisms in the environment. If those micro organisms are entering into our mouth through our food it is affecting our body. We are not only explaining the students about hand wash but also we focused the importance of the bath, teeth cleaning everyday two times and overall hygiene which is required for body. Teachers *Mrs. Deepali Gade* and School *Head Master Mr. Salavi Ramchandra* are appreciate our work.

Summary of Day 7

Sr. No.	Location	People Acknowledges and Track	Conducted Track as (in Short)	Total Time
1.	Alandewadi Village, Tal. Bhor, Dist. Pune	Total Peoples: 125	Discussion about garbage management and our idea about garbage management	3 Hours

Day 8:

25th July 2019

Village: Gujar - Nimbalkarwadi, Tal. Haveli, Dist. Pune

We have started our 8th day of Swachhata Abhiyan in Gujar-Nimablkarwadi on 25th July 2019. We visited Z. P. School, Gujar - Nimbalkarwadi. These school are having students of standard first to standard seventh. Here we found the students who are actively participate in activity conduct by us. We took their session which includes the topic of own hygiene maintain, school and house cleaning. We will explain following points along with school and house to maintain

1. Our village clean is our prime responsibility. There are so many people throwing their household garbage on the roadside.
2. There houses are cleaned but ultimately our resident area, school area will be having lot of garbage collected. This is mixed kind of garbage which cannot be used further.
3. City area is having provisions to uplift this kind of garbage but village cannot have such facility. So this is ultimately the people's responsibility that is residential of that village. They have to think how the garbage from home should be minimum and even that minimum garbage should be managed in proper manner.
4. Children should avoid open toilet and pissing.

To explain all such things we showed one animated movie in front of students. Students are encouraged to watching movie about the clean and maintain their village. We both present a short drama in front of students which aims the how open toilet is problematic.

There were three teachers present for this session.

Day 9:

26th July 2019

Village : Mangadewadi, Tal. Haveli, Dist. Pune

We start our day 9 with working on Swachhata Abhiyan at Mangadewadi. At the entry of Mangadewadi we found large area along with Garbage which is near water stream. In this area we found the comedy board written in Marathi by affected people, "if any lady can put garbage here her husband would be died and if man can put garbage here then his wife can run away with other man". But no one cares this kind of message and throws their household garbage directly on the roadside itself.

Primarily we visit Z. P. School, Mangadewadi. This school is just beside of the Gram Panchayat. School is having students standard first to standard seventh. Here we saw a wonderful scene since school was yet not started. Three to four girl students use to clean their classrooms. They clean bench, desks, and black boards. By asking them about this kind of cleaning they replied each students having ordering number for cleaning. Further we take our session on the all students of school. Two teachers Mrs. Shalan Khutwad and Mrs. Kalpana Thorat also joined us in the session. We initially were showing the animated movie followed by drama. Students were interactively participating in our session and they also shared different ways to reduce the garbage. We were trying to gives them the solutions which are based on the scientific based. We were sharing them the classification of garbage into two parts wet and dry garbage, avoid open toilet and pissing, problems due to throwing garbage etc. Finally we take pledge which is based on Swachhata.

Further we visited one of the Z. P. School, SundarNagar which having standard first to fourth students. We guided them about the types of garbage and ask few samples, students easily find out the type of garbage. we try to explaining them classification of garbage. Further with the help of one student we set the drama which is based on issues from open toilet. Students were enjoying the drama. Finally we are taken pledge which is based on Swachhata.

Next we move to the ZP School Urdu medium. Initially, we thought this was difficult task for us since we have to face students of Urdu medium and we are unaware about Urdu. But we covered our session into 3 parts in the Hindi and students also easily understand exactly problems of garbage. We show the animated film to them. In our session we tried to cover

points such as classification of garbage and its management, avoid open toilet and pissing, etc. For these session six teachers are present. Finally the all three session students are collectively come at one place and taken the pledge of Swachhata.

Day 10:

27th July 2019

Village : Bhilarewadi, Tal. Haveli, Dist. Pune

Bhilarewadi is village which is located on the hills of Pune district. We are starting our day of Swachhata Abhiyan with Bhilarewadi on Tuesday, 27th July 2019. We visited Z. P. School, Bhilarewadi having students of standard first to five. In school, we took a session on 'SWACHHA BHARAT'. In that, we give information about waste, classification of waste, solution on garbage waste,

We have explained to the students in easy way to make vermicompost fertilizer using household -garbage. We told them an easy way to go from clean to prosperity.

Through the films and exhibition, we have shared information on solid waste management and issues generated by open toilets in the school. We explained the students important and advantages of 3R's and the process of processing waste. We put together a pictorial exhibition which is fully based on waste, classification of waste, waste management, waste ailments, and remedies. The outside villagers crowded to see this exhibition we had presented. We made them involved too and they were given this information about waste management.

We both present a short drama on the open toilet in front of students. We explained to them how problematic this can be. In the last session, we all took a pledge of swach and made a promise to follow this pledge.

Head mistress of the Bhilarewadi Smt. Kakade Seema Balasaheb was present for this session. They validated us for the work what we do and gave best wishes for further plans.

Then we visit the Anganwadi No.-2, Bhilarewadi. Anganwadi is located in front of the Z. P. School. We met Anganwadi- teacher Mrs. Vandana Yashvant Nalavade and her helper Mrs. Manisha Sanjay Malekar. In Anganwadi there is total of 27 students coming for learning, playing and performing many more activities. We talked to them about the cleanliness of the little ones. She also discussed what hygiene we can expect from small children.

After visiting Anganwadi, we can try to reach some houses and talk to family members about household garbage management. We advise villagers to made soak pit for their kitchen-water, washroom-water, Bathroom-water and leave it all in that. We also told them its advantages and importance. We met with Sarpanch of the village and discussed with them on the serious issues of the village's waste management and open toilet and pissing. We discussed on soak

pits topic. Explained them advantages of soak pit and give suggestion to implement in our Bhilarewadi.

Summary of Day 10

Day 11:

28th July 2019

Village : Panshet and Panshet Road (Ambi Village), Tal. Velha, Dist. Pune

We started our day 11 on Sunday 28, July 2019. It was too much rainy day. But we were still working with our target. Panshet Dam is one of the dams by which Pune City gets its drinking water though Khadakwasla dam. Panshet village is having its own Gram Panchayat. *Mr. Ravindra Kamble* is Sarpanch of Panshet Village. We met the village people and discuss their garbage related problem. Here we mostly meet the shop holders instead than houses. We visit to shops near to entrance of Panshet village such as chicken shops, Mutton shops, Hair cutting saloon, snack shops etc. We saw some of the shops can leave their shop outlet directly in river stream.

Then we met *Mr. Ravindra Kamble*, Sarpanch of Panshet and discussed about the garbage situation of panshet. He said that our area has already sanctioned a *Ghanta Gadi* which we started soon. We exchanged our action plans with him about the garbage management like as Vermicomposting, Biogas etc.

Further we met some people who are resident of Ambi village which is at Panshet road, where we meet people who engaged in the *Bhat Lawani* (Rice Planting). We also join them to their work. Meanwhile we discuss our regular points on Swachhata especially hygiene of legs and hands. These peoples are continuously work in the mud. After these work they compulsory wash properly their hands before other work specially eating something.

Summary of Day 11

Day 12:

29th July 2019

Village : Gujar-Nimbalkarwadi, Tal. Haveli, Dist. Pune

We started with our day 12 with Sumati Balvan School, Gujar-Nimbalkarwadi on 29th July 2019. This is private school but the owner of the school runs the orphanage for girls. There are total 16 girls living as well as taking free education from the Sumati Balvan.

The school is having 430 students from standard first to standard tenth. We divided our session into two parts. First was for standard first to sixth and second was from standard seventh to tenth. We showed the animated movie to the students by which students itself shared that how using open latrine, garbage throwing to open space, spitting and open pissing is not well as good citizen. Even we have to restrict this kind of incidents wherever we saw.

Further we took drama session which was almost famous among the students. These students are also take part in the drama.

Finally we take pledge with these students regarding the swachhata.

Secretary of Mrs. Balwan are appreciated our work regarding swachhata.

Summary of Day 11

Day 13:

30th July 2019

Village : Jambhulwadi and Kolewadi, Tal. Haveli, Dist. Pune

Jambhulwadi and Kolewadi are the two villages which are located on the hills of Pune district. Farming is the major business of the people of this region. Some of people are engage with dairy and cattle farming as supporting business.

We have started our day of Swachhata Abhiyan with these villages i.e. Jambhulwadi and Kolewadi on 13th day, 30th July 2019. Initially we visited Z. P. School, Jambhulwadi and then Z.P. School, Kolewadi. Jambhulwadi School is having students of standard first to seventh and Kolewadi School is having student of standard first to fourth. In both school we have taken a session on 'SWACHHA BHARAT'. In that we try to communicate with students and understand their issues related with garbage collected in their region.

We explained the students through an easy way to make compost fertilizer using coca-peat (which we easily made up of coconut waste), papers and kitchen waste. This mixture is used to make vermicompost. We clean our house, Schools and the collected garbage in house or schools are directly thrown outside from the house then area gets dirty.

We have asked students whether this throwing garbage on the road is right or wrong. Is the classification essential or not?

How to decompose waste? How and where collect waste?

Through the films, drama and exhibition we shared own ideas and information in the school about the things that can be done to keep their home, there school and the area clean and the process of processing waste. We have put our poster exhibition outside to the school so there was outsiders also who visited our exhibition. They liked our ideas and thought about garbage management.

We both have presented a short drama on open toilet in front of students which aim is that how open toilet is problematic. In the last session we all took pledge of swachta and promised to follow this pledge.

There were five teachers in Jambhulwadi Head Master Krishna Kadu and sub-teachers Mrs. Suvarna Shenge, Ambika Suram, Sushama Jadhav, Rajabhau Mane and one teacher from Kolewadi presented for this session.

On the same day we also started with a new work which highlights our mission that is writing quotes on walls by painting. We painted many quotes on the School wall of Kolewadi.

After School, we tried to reach some houses and we talked to family about the household garbage management, including how to convert the daily waste into organic fertilizers and the responsibilities and duties of each citizen on cleanliness.

We further visited to one of the cattle firm in which we meet Mr. Aanta Jambhale. There are so many cattle are there. Jambhale can just collect the cow dung and stored at one place mixed with the garbage waste. What we observed this is the best practice to manage the garbage, but one thing missed in this case.

Focusing on waste in village such as house hold garbage, cow dung "Biogas" generation is best solution.

Biogas is generated from the waste and cow dung without the use of electricity or any external source; it also saves the cost of the cylinder as Biogas is available along with the waste disposal. So we shared this idea with proper solution on the waste and one step before fertilizer creation.

Day 14:

31st July 2019

Village : Ambegoan (Bk) and Ambegoan (Kh), Tal. Haveli, Dist. Pune and Dalaviwadi, Nanded

Early morning we started our Last day 14 with *Anganwadi Sevika* with a discussion of waste management on 31st July 2019. Around 15 *Anganwadi Sevika* were gathered around the Ambegoan (Bk.) unit along with their head. *Anganwadi Sevika* starts their duty to help the pregnant women right from their pregnancy till the born baby becomes six years old. We are enlightening their work by explaining to them the information about waste management and hygienic India. The pregnant ladies require the hygienic conditions until their baby will born. After delivery the mother and newborn both required the clean and healthy atmosphere around it. We demonstrated our poster presentation about the cleanness in the society. After completion of it, we visited the *Anganwadi* in the Ambegoan (Bk.). There is a total of 26 children had welcomed us.

These are too small children of age from three to six. In the beginning, we saw their nails and made a star on the hand who have cut their nails in a proper manner. This star indicates their good habits. After that, we showed our poster to them in which there were two areas out of which one is clean and the other is with garbage. Students prefer the clean one. We also had dance session on the Swachhata song. We also demonstrated the housefly and its problems. They were happy to see housefly and our remaining posters. Finally **Mrs. Rekha Pralhad Beldare** thanked us for our session on their students. We also painted various quotes on their Anganwadi wall regarding Swachhata.

After that we visited the Late Indubai Ramchandra Dalvi Primary School, Dalviwadi, Pune. This school is of standard First to standard Seventh. As this school is settled down on the boundary of village and city many of village- resident students are also there in school of Pune Municipality. In this school we showed animated movie as well as our session on Swachhata.Swachhata.

After that, we visited the Late Indubai Ramchandra Dalvi Primary School, Dalviwadi, Pune. This school is of standard First to standard Seventh. As this school is settled down on the boundary of village and city many of village- resident students are also there in the school of Pune Municipality. In this school, we showed an animated movie as well as our session on Swachhata. Swachhata session includes the classification of dry and wet garbage with some

sort of example, issues related to the open toilet and pissing. Students are happily answering our questions.

We also presented the drama in which we discussed the health issues of open toilet. Finally, we took the pledge by which students motivate not to make more garbage, not to go for the open toilet and pissing and participated in clean India.

Finally, we visit Z. P. School, Ambegoan (Kh.), Tal. Haveli, Dist. Pune. The School is having 100 students from standard first to fourth. All Students were gathered in one classroom. We show an animated movie for them. Students were encouraged towards cleanness by watching the movie. How dirty area affects the health of village peoples are understood by the students. We also presented a drama in front of the students. Students also participated in the drama which is based on the open toilets and its issue. At the end, we took the pledge with students and teachers. Finally, the Head Master of school gave us a vote of thanks.

Conclusion

We are happy to completed 86 hours while we have target to complete only 50 hours. We have reached to different villages in three districts i.e. Pune, Ratnagiri and Ahemadnagar. We have taken session with 2190 students. This is unbelievable digit for us too. We have successfully completed 22 different kind of sessions on educational institutes especially Z. P. Schools. Here we reached right from Anganwadi students to college going students. We have visited almost 579 peoples with different suggestions.

In the journey of the Swachha Bharat Summer Internship we have focused more awareness part on the students since we understand students are the future developers in the main stream.

At the time of taking session by talking, discussion with them they have acknowledged our point of view regarding cleanness. We have taken drawing session, animated movie session, drama session by which students also utilised their skills and knowledge about how cleanness is more important.

We also majorly covered the point of problems and issues of open pissing and toilets. How everybody looks at this case as very essential need. We talk to students overall factor.

Final session in some schools we took folk song and dance where students enjoyed a lot. We also conducted drawing session where students drew their skills. We gave them topic like cleanness.

We also talked to students about garbage management. For that we arranged exhibition in various school. Even we showed some of the posters for children to create awareness about the classification of garbage. We also added some in brief details of waste management in front of college students regarding liquid waste, solid waste, recycling waste, hazardous waste and organic waste.

We gave people advice about kitchen garden especially to women who throw their kitchen waste. They can plant in kitchen window some of the plants like curry leave plants, Pudina plants, and chilly plants and put everyday kitchen waste into that only.

While talking to people we also discussed about vermicompost. Vermicompost is best fertilizer type to all types of plants. We also discuss the points of biogas and soak pit.

We also discussed with people about their dry garbage management with the help of junk dealer. Junk dealer is one of the people who reduce all types of garbage by exchange money to us.

Up till now we have achieved this target regarding Swachata Abhiyan. But it is completed rather it is the beginning to make people aware about keeping their surrounding clean and healthy. This is essential for the health of people and environment too. This type of movement should be circulated among the youths of across schools and colleges to contribute in the paying responsibility towards nation as well as society. This Swachhata Abhiyan here, we are keeping it continue.....

Appendix 1 : Our Drama

(Writer : Akash Kolhe - Student SYBBA - Computer Application & Principal Alok Pawar)

Drama based on Open Toilet

आकाश सुधारला ... तुम्ही कधी सुधारणार

(आकाश हातात बादली घेऊन शेताकडे चालला असतो)

- सर : काय रे आकुडी, कुठे चालला सकाळ सकाळ..
- आकाश : शेतात...
- सर : शेतात आणि बादली घेऊन ...
- आकाश : हो चालतो असच सहज...
- सर : सहज पण बादली घेऊन, खरं सांग आकाश कुठं निघाला.
- आकाश : (लाजून) संडासला चाललो आहे...
- सर : अरं तुम्ही काय शेतात संडास बांधले काय ?
- आकाश : नाही उघड्यावर बसणार... (आकाश पोट धरून चेहरा केविलवाणा करतो)
- सर : उघड्यावर बसणार... छि छि... अरे तुला कोणी बघितलं तर लाज नाही वाटणार...
- आकाश : नाही मी लपून बसेल.
- सर : तू लपून बसशील पण पुढे अवघड होईल...
- आकाश : त्यात काय अवघड
- सर : बरं मला सांग तू पोटाला का धरून आहेस ?
- आकाश : दुखतंय जरा दोन दिवस झाले.
- सर : मला सांग तू रोज येतो ना इकडे शेतात संडासला
- आकाश : हो
- सर : अरे तुझ्या संडासवर माशा बसतात आणि त्या तुझ्या रोज घरी येतात.
- आकाश : हा येतात
- सर : अरे त्या घरी येऊन तुझ्या जेवणावर पण बसतात आणि तेच जेवण तू खातोस.. मग काय ती सगळी घाण पोटात. मग पोट नाही दुखणार का? आता काय तुला डॉक्टरकडे जावे लागेल.
- आकाश : हो जावेच लागेल
- सर : मग डॉक्टर तुला काय टोचनार
- आकाश : इंजेक्शन
- सर : मग काय पैसे पण घेईल
- आकाश : १०० रुपये घेईल

- सर : मग गोळ्यापण लिहून देतील डॉक्टर त्याचे पण पैसे होतील
- आकाश : त्याचे पण पैसे होतील १०० रुपये
- सर : मग एकूण किती झाले
- आकाश : २०० रुपये सर
- सर : कोणामुळे झाले कळले का?
- आकाश : त्या माशांमुळे
- सर : नाही रे आकुडी तू शेतात बसलाच नसता तर त्या माशा घरी आल्याचं नसत्या ना... म्हणजे तू जवाबदार झाला ना ...
- आकाश : अरे हो!
- सर : मग आता शेतात बसणार उघड्यावर का घरी जाणार ..
- आकाश : घरी संडासात बसलेलं बरं
- सर : पण अजून एक अडचण आहे
- आकाश : कोणती सर?
- सर : हे बघ तू तर सुधारला पण अजून तिकडे शेतात जाणारे लोक आहेत ना माशा काय विचारून थोडी येणार
- आकाश : होना आपण सगळ्यांना सांगितलं पाहिजे ...
- सर : काय
- आकाश : संडास नको उघड्यावर...
तरच निरोगी आयुष्य मार्गावर..

Appendix 2: Folk Song

(Poet : Alok Pawar, Lyrics taken by original Song)

डोल डोलतय वार्यावर बाय माझी,
डोल डोलतय वार्यावर

खंडोबा राया परतंय मी पाया
नको हा कचरा आपल्या गावाला

उघड्यावर घावली कोल्यांची सावली
लांब लांब जाती घेउनी बादली

घरीच बसू दे आपल्या मोरीला
स्वच्छता राहतीया आपल्या गावाला

ओला सुका कचरा जातंय आपल्या पेटीला
नको ते प्लास्टिक अन पाला पाचोला

पुनवेचा चांद कसा डोंगराला आयलाय गो
पुनवेचा चांद कसा डोंगराला आयलाय्

दिनांक : २३/०७/२०१९

स्वराज कॉलेज ऑफ कॉमर्स अँड कॉम्प्युटर स्टडीज, धनकवडी, पुणे - ४३ येथील द्वितीय वर्ष बी.बी.ए. (कॉम्प्युटर ॲप्लिकेशन) मध्ये शिकत असणारा विद्यार्थी कु. कोल्हे आकाश कुंडलिक याने राष्ट्रीय सेवा योजनेद्वारे चालविण्यात येणाऱ्या 'स्वच्छ भारत समर इंटर्नशिप' या योजनेअंतर्गत आमच्या आळंदेवाडी गावामध्ये येऊन स्वच्छतेच्या कामांसाठी लोकप्रबोधनाचे काम केले. या सर्व स्वच्छता अभियानात स्वराज महाविद्यालयाचे प्राचार्य पवार अलोक अर्जुन अलका यांनी देखील सहभाग घेतला होता. अभियानामध्ये घरोघरी जाऊन स्वच्छतेबद्दल गावातील लोकांना मार्गदर्शन केले ज्यामध्ये ओला व सुका कचरा वर्गीकरण तसेच उघड्यावर शौचालयास होणारे दुष्परिणाम याचे महत्व पटवून देण्यात आले. प्लास्टिकच्या वस्तूंचा वापर कमीत कमी करण्यासाठी देखील जागृती करण्यात आली. गावातील जिल्हा परिषद शाळेमधील विद्यार्थ्यांना देखील स्वच्छतेवर आधारित चित्रपट दाखवून तसेच त्यांच्यासमोर लघुनाटिका सादर करून स्वच्छता अभियान राबविण्यात आले.

गावामध्ये ठिकठिकाणी कडूलिंब, आंबा, चिंच अशा विविध झाडांचे वृक्षारोपण देखील यांच्यामार्फत करण्यात आले.

आमच्या गावाच्या विकासाच्या दृष्टीकोनातून आकाश कुंडलिक कोल्हे आणि प्रा. अलोक पवार यांनी केलेल्या कार्याबद्दल आभार !

P. M. Pawar
